Woods and Hybrids: Ben Sayers M11 complete set

The complete M11 package set consists of a 460cc oversized titanium matrix driver with matching oversized titanium matrix 3 and 5 woods, all featuring tactical flight channels promoting a lower CG and the perfect launch angle for increased distance, accuracy and maximum forgiveness. This cutting edge hybrid replaces the longer, harder to hit traditional irons incorporating an offset hosel to eliminate sliced ball flight. By lowering the CG we have also achieved a higher penetrating ball flight, resulting in increased distance and accuracy.

Irons and Putter: Ben Sayers M11 complete set

The stainless irons (5-SW) featuring an undercut cavity design and fully embossed medallion. The sleek head shape design with an undercut cavity and wider sole and top line helps to promote extra forgiveness and increase playability. Confidence building irons with great performance. The new style mallet putter featuring a soft polymer insert and alignment aid ensures a soft but responsive stroke every time.

All woods and utility clubs come complete with head covers. All sets come with either a top of the range stand or cart bag offering features you would expect from a Ben Sayers bag.

All prices incl. VAT. As stock lasts. Price subject to change.
